

## **ASSEMBLY FOR ATTACHING A CLAMP TO A HOSE**

### **Abstract**

A clamp assembly comprising a clamp including a band having and a screw housing mounted to said band with a worm screw disposed in said screw housing, said worm screw engaging said band for tightening said band; and a cover bracket having an opening receiving said screw housing, said cover bracket including a cover portion for the screw housing and a bonding surface extending from the cover for attaching the cover bracket to a hose, the bonding surface extending from the cover portion to a position on the hose that is displaced from the screw and the screw housing such that the cover bracket can be adhered to the hose without interfering with the clamp assembly.
